

Is Your Space Bright...But Draining? Looks Well-Lit. Feels Exhausting.

Most indoor environments are built to meet energy codes and visual standards. But here's the problem:

Brightness isn't the same as biological light

Today, people spend their days in spaces that appear bright, yet leave them feeling:

- **Fatigued**
- **Unfocused**
- **Disconnected**

The Missing Ingredient: **BLUE SKY LIGHT**

Modern research and technical standards, including RP-46-25 from the IES, confirm what we instinctively know.

We perform best under a blue sky.

That blue sky spectrum activates the body's melanopic receptors—helping to:

**Boost
Energy**

**Elevate
Mood**

**Sharpen
Focus**

**Improve
Alertness**

The target is to achieve greater than 250 m-EDI at the vertical plane, measured at eye level.

Incorporating **Blue Sky Lighting** into your space evokes the essence of nature. It captures the uplifting feeling we experience on a beautiful day under a clear blue sky

Why this matters for your business.

Lighting doesn't just impact visibility. It impacts **performance**.

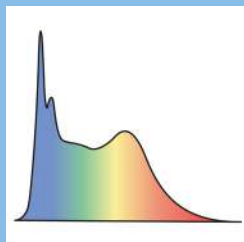

When people feel better, they:

- **Work more efficiently**
- **Learn more efficiently**
- **Collaborate more clearly**
- **Recover more quickly**

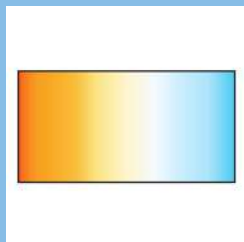

Better Light = Better Outcomes

Introducing a Smarter Way TO LIGHT INDOOR SPACES

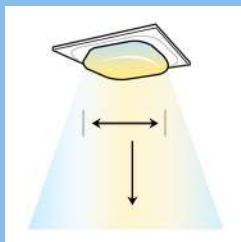

Effective melanopic light depends on 5 things:

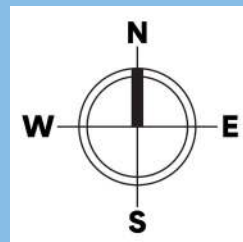

Spectrum

Color (CCT)

Intensity

Direction

Time

SkyView™ Tile – Blue Sky Energy Indoors.

*A breakthrough, patented **Blue Sky Gradient** solution designed for real-world spaces.*

What makes it different?

Day Mode—Delivering the melanopic light people need to feel energized, focused, and alert.

Evening Mode—Reducing the stimulus when it's time to wind down.

Simple Controls—No complexity. No disruption. Works with standard systems.

Flexible Applications—Office, Education, Healthcare, Retail, Athletics.

Day-Only Mode—Perfect for spaces that don't operate at night.

Designed for Real Projects—Not Just Theory

- Seamless integration
- Standard installation
- Energy compliant
- No added operational budget

This isn't a concept. It's a practical solution.

**Feel Better.
Think More Clearly.
Perform at Your Best.**

*Because Lighting
Should Do More Than
Help You See.*
